

1. Add a new course POST: <http://localhost:8080/coursepractise/webapi/courses>

```
{  
  "courseId": "CYSEAAAA",  
  "department": "Computer Science Align",  
  "lectures": [7]  
}
```
2. Add a new student: POST <http://localhost:8080/coursepractise/webapi/students>

```
{  
  "firstName": "Tester",  
  "lastName": "T",  
  "studentId": "t.tt",  
  "imageUrl": "Do not have a url",  
  "department": "Information Systems",  
  "joiningDate": "09/10/2017",  
  "emailId": "Write down you own email",  
  "courses": []  
}
```
3. Register new courses to students (if you add more than 3 courses, you will just register the first 3 courses successfully)
POST : <http://localhost:8080/coursepractise/webapi/students/t.tt/register>

```
[  
  {"courseId": "CYSE6225"},  
  {"courseId": "CYSEAAAA"},  
  {"courseId": "INFO7390"}  
]
```
4. Add a new announcement:
POST : <http://localhost:8080/coursepractise/webapi/announcements>
Based on the requirement of Assignment2, an announcement do not have courseId.
boardId = 2 belongs to course: INFO7390

```
{  
  "annId": "ann06",  
  "announcementText": "This is the sixth annoucement!",  
  "boardId": 2  
}
```
